Johan Kjær Nielsen

Financial Risk Analyst & Data Analyst looking for position in Copenhagen

With a strong background in mathematics, finance, and data science, I enjoy using analytical methods to solve practical problems. I am open to opportunities in data analysis, data science, quantitative analysis, risk & performance analysis, or similar analytical roles where I can contribute with my skills and experience.

PROFESSIONAL EXPERIENCE

Now | 2026-10

Data Analyst

Divisionsforeningen [Danish League], Football Department

Brøndby, Denmark

2026-06 | 2024-09

Data Analyst

Dansk Boldspil-Union (DBU) [Danish Football Association], DBU Performance

Brøndby, Denmark

Working as a Data Analyst in the Football Analysis department (DBU Performance) in DBU, where I am responsible for developing data-driven solutions to support the analysis of football matches and players across all Danish national teams. My work involves processing, analyzing, and visualizing large datasets of football-related data, such as tracking data, event data, tagging data and physical data.

Skills

> Python, SQL, Streamlit

□ VS Code, Git, Azure, SportsCode

✧ AI, Den Røde Tråd 2.0, Tracking Data, Event Data, Football Tactics

Results

- I created an application that visualized the success rate of transitions between each pair of moments in Den Røde Tråd 2.0 (XML → Python → XML & HTML).
- I developed an ELO-model used for ranking National Teams across countries, gender, age and time.
- I co-created a scout-bot capable of tagging matches from event and tracking data.
- I gained and distributed AI knowledge in my team by completing an internal AI Ambassador programme in DBU.
- I conducted various analyses on corner kicks, goalkeepers, xG, finishing, crosses and more.

SELECTED SKILLS

> Programming

R
SQL
Python
VBA
MATLAB

□ Software

Excel
LaTeX
ChatGPT
Dimension
Claude
Git
Power BI

Languages

Danish
English
German

✧ Expertise Areas

✧ AI-assisted development
✧ Financial risk management
✧ Mathematical modeling
✧ Danish mortgage bonds
✧ Data science
✧ Football data analysis

Investment Risk Analyst

Nordea Asset Management, Danish Fixed Income & European Covered bonds — Copenhagen, Denmark

Worked at Nordea Asset Management as an Investment Risk Analyst in the Danish Fixed Income & European Covered Bonds team, where I was responsible for developing and maintaining risk models, conducting risk analyses, and providing insights to support investment decisions. My work involved analyzing financial data, implementing risk management strategies, and collaborating with portfolio managers to optimize risk-adjusted returns. I built various tools for portfolio managers and sales used in risk management, portfolio construction, stress-testing and performance decomposition.

Skills

> SQL, VBA, R

□ Excel, Nordea Analytics, SimCorp Dimension, Oracle, Power BI

✧ Danish Mortgage Bonds, Financial Derivatives, Mathematical Modelling

Results

- Responsible for the internal risk model (factor model) covering the entire investment universe (Danish and global covered and government bonds, currencies and derivatives) used for all funds (long-only and hedge funds).
- Creation of an interactive performance decomposition tool on top of the risk model, giving detailed multi-level insights into performance drivers and exposures.
- Strengthening interest rate risk modelling: Duration vs PCA vs Duration-bet Minimizing Tracking-Error.
- Education of clients using Nordea Analytics.
- Extensive modelling of callable Danish mortgage bonds.

EDUCATION

2010-08 | 2005-08

University of Aarhus

M.S. in Mathematics-Economics, Cand. Scient. Oecon., Specialization: Finance — Aarhus, Denmark

Master's Thesis: Credit Risk Modelling and the Gaussian Latent Variable Model for CDO Pricing

My Cand.scient.oecon. degree has given me a strong foundation in mathematical methods applied to economics and statistics. It has strengthened my logical reasoning, helped me learn new concepts quickly, and enabled me to understand and develop models for complex problems.

Skills

> MATLAB

✧ Mathematics, Statistics, Mathematical Finance, Economics, Econometrics

Results

- Grade avg. (7-point scale): 10.1

COURSES & CERTIFICATIONS

2013

Advanced Risk & Portfolio Management Bootcamp (ARPM), by Attilio Meucci

New York University/Symmys — New York, USA

6-day course in advanced data science with applications in Quantitative Finance.

Skills

✧ Mathematical Finance, Mathematical Modelling

2011

Modeling, Valuation, and Hedging of Interest Rate Uncertainty

Copenhagen Business School — Copenhagen, Denmark

1-week summer school course focusing on modeling of interest rates, Danish callable mortgage bonds and interest rate derivatives.

Skills

□ Excel

✧ Danish Mortgage Bonds, Interest Rate Modeling, Mathematical Modelling

2017

R Programming (Basic + Advanced)
SuperUsers — Hillerød, Denmark
Two 3-day courses in R programming

Skills
> R
□ RStudio

2025

Applied Data Science in Python
Teknologisk Institut — Høje Taastrup, Denmark
Two days of Python and machine learning

Skills
> Python
□ Jupyter Notebook
✧ Machine Learning

2012-09 | 2010-09

Nordea Graduate Programme
Nordea Asset Management — Copenhagen, Denmark
A 2-year professional development programme for graduates at Nordea, covering topics such as leadership, values, communication, stress management, nutrition, exercising, and planning.

TEACHING EXPERIENCE

2010-04 | 2009-02

Statistics Instructor
University of Aarhus — Aarhus, Denmark
For two semesters I was a statistics instructor in '*Statistics and Data Analysis*' teaching basic statistics and tests for significance of parameters and treatments.

2018-05 | 2015-03

Voluntary Worker
Indvandrer Kvindecentret — Copenhagen, Denmark
Helping young boys from Somali families in the Nørrebro area through dialogue, homework support, and everyday mentoring. This included explaining the beauty of percentages, the mechanics of Danish society, education pathways, and job opportunities — and, of course, listening carefully to why Messi is way better than Ronaldo.
